

MAINTENANCE

Streamline your outsourced process with Trimble Transportation and Navistar.

Whether it's for planned maintenance or an unexpected breakdown, getting your trucks back on the road ASAP starts with the right technology.

The seamless two-way integration between TMT Fleet Maintenance and Navistar's International 360 directly connects users to 700 service center locations throughout North America, all in a single pane.

View, track, and communicate the progress of your Navistar and non-Navistar repairs through TMT – eliminating going back and forth between systems, emails and phone calls. And do it all with the assurance that you've found the best facility for your fleet.

Outsource repairs efficiently by:

- Using a central hub for Connected Maintenance
- Improving communication to reduce asset downtime
- Mitigating repeat repairs
- Eliminating manual entry, reducing time of keying and error
- Significantly reducing duplicate data entry
- Ensuring accurate details across the board, increasing potential of warranty recovery
- Increasing visibility and audit tracking of repair communications

Ready to maximize your asset utilization?
